CONCRETE pools

At Bluetongue Pools our goal is to build a pool that will exceed your expectations. We combine cutting edge design & construction techniques with the highest quality components & professional tradespeople. Our results speak for themselves. An unblemished record of customer satisfaction throughout our 25 years in the industry.

QUALITY PROFESSIONALISM AFFORDABILITY

DESIGN

We work with the layout of your property and the architectural style of your home. Function, safety and aesthetics are all considered when Bluetongue Pools create a specification and design. Understanding all the elements that go into building a swimming pool enables us to custom design a swimming pool to your unique individual needs.

QUALITY PROFESSIONALISM AFFORDABILITY

At Bluetongue Pools we believe successful design is achieved through the collaboration of ideas. From concept to completion we'll work to incorporate your vision into a design that is both aesthetically striking and complimentary to your home and landscape whilst also remaining functional and practical.

We aim to establish a solid working relationship with you from day one and strive to continue the partnership throughout the process. We'll develop the design brief together and focus on encapsulating the concept early to ensure the delivery process is clear and decisive.

During this design phase Bluetongue Pools will introduce you to an endless catalogue of concepts and available options and encourage your creative capabilities to shine.

You may be imagining an infinity pool where the water seamlessly flows into the landscape or an eye catching feature spa with a raised glass wall, the concepts are endless and Bluetongue Pools awaits the opportunity to make your dream pool a reality.

QUALITY PROFESSIONALISM AFFORDABILITY

CONSTRUCTION

At Bluetongue Pools, we're aware of the need to remain at the cutting edge of pool construction. In our pursuit of building the finest swimming pools possible we frequently travel to conferences abroad to ensure we are always at the forefront of the latest pool construction techniques, technology, materials and creative design ideas.

QUALITY PROFESSIONALISM AFFORDABILITY

STAGE 1 EXCAVATION

Bluetongue Pools experienced tradespeople will mark out the pool parameters on site, identify any services that may be obstructing and string line your pool ready for excavation. This stage is critical to ensure future stages in the process follow smoothly. The area will then be excavated, materials removed and the excavation area secured.

STAGE 2 FORM WORK, STEEL FIXING & PLUMBING

Formwork is used in concrete swimming pools as a method of molding the shape of the structure. It creates the form of the pool. The steel provides the strength and support for the concrete and enables the builder to shape the pool to your unique design. Plumbing for the filtering and cleaning systems will then included.

STAGE 3 CONCRETE

Our experienced team will then spray the internal structure of your pool with concrete. This is when you'll get a sense of your pool coming to life & can maybe visualise the finished product! The concrete will require approx 4 weeks to cure. We like to keep the ball rolling so other works, such as landscape construction, may be commenced during this stage.

STAGE 4 INTERIOR FINISHES

Every care will be taken as we clean and prepare your pool for its interior. Your journey is coming closer to completion! Depending on your choice, the pool will be lined with tiles or rendered before a final detail clean is undertaken to remove any debris. Fencing and compliance inspections will be carried out, it's then time to fill your pool!

QUALITY PROFESSIONALISM AFFORDABILITY

UNIQUE DETAILS

As a full service design and build company, we have the skills and experience to construct, design, engineer and fully service our builds. Alternatively we can work with your consultants to accommodate any requirements they may have. Our team has the flexibility to work on modest budgets or large commercial projects, and everything inbetween.

QUALITY PROFESSIONALISM AFFORDABILITY

INFINITY EDGE

An infinity pool is constructed with water flowing seamlessly over the pool rim on one or more sides. Such pools are often designed so that the infinity edge appears to merge with a larger body of water such as the ocean. It produces a striking illusion that the water has no boundary.

WATER FEATURES

Compact and discreet, water features can be standard or custom designed to suit your specifications. They add an interesting visual element to your pool design, they can be constructed to deliberately catch the eye or made to blend into the landscape or pool surface.

INTEGRATION

Your pool or spa is not complete without stunning landscape design. Let our award winning team work with you to create a unique and customised outdoor space to compliment your pool and enhance your lifestyle.

VIEW WITH A DIFFERENCE

Visualise one side of your pool constructed entirely of glass or a viewing window into your pool that can be seen from a room inside your home. With innovative products Bluetongue Pools can deliver this cutting edge technology, it may be your design masterstroke! The options are only limited by your imagination.

QUALITY PROFESSIONALISM AFFORDABILITY

INCLUSIONS & OPTIONS

Our goal is to provide you with the best design and highest quality components package based on your needs and desires and to efficiently perform and manage the construction process. We will achieve this through open and regular lines of communication with you to ensure your ongoing satisfaction with the services we provide.

QUALITY PROFESSIONALISM AFFORDABILITY

QUARTZON INTERIOR

A luxurious pool render with an exquisite colour range that produces a stunning visual effect in your pool. It is extremely smooth, strong and durable, slip resistant and easy to maintain.

AQUA THERAPY – MINERAL POOL FILTRATION

Mineral pools are rich in magnesium and potassium. These minerals have therapeutic benefits, are gentle on the skin and completely safe for our soil and plants. Your mineral pool will have no chlorine scent or leave a salty, dry feeling on your skin.

POOL COVERS

Swimming pool covers ensure that you save precious water by limiting evaporation, minimising the loss of chemicals and heat which would otherwise occur and ultimately saving you money. There are covers suitable for every pool, the choice is yours.

POOL INFLOOR CLEANING SYSTEM

An in-floor cleaning system is virtually maintenance free, you won't even notice it's there. It automatically cleans your pool, including steps, seats and swim out areas so you can spend your precious leisure time with family and friends.
